Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on April 16, 2004, is being considered by the examiner.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over James et al. (US 5,906,786) in view of Koerber et al. (US 5,916,659) or Agarwal et al. (US 4,693,920) or George et al. (US 4,428,999). James et al. disclose nonwoven fabrics with raised portions. The micro-sized pattern produces a background portion of the fabric and the macro-sized recessed regions produce the raised portion of the fabric. (abstract). James et al. fail to disclose that additives are added to the raised and background portions.

Koerber et al. (US 5,916,659) disclose composites comprising a nonwoven binder wherein, as shown in claim 8, the nonwoven is between a fluoropolymeric portion and a non-fluoropolymeric portion. Agarwal et al. (US 4,693,920) disclose a nonwoven substrate having an adhesive coating on one side of the substrate (col 2, In 28-48) and a resin coating on the other side of the substrate (col 2, In 49-61). It should be noted that the materials making up the resin coating and adhesive coating are different polymers. George et al. disclose a nonwoven fabric (col 4, In 22-24) having a

vapor barrier coating (col 4, ln 52-58) on one side of the fabric and refractory coating on the other side of the fabric (col 5, ln 20-31). These references all show that it is well known in the fabric industry to coat a fabric with different compositions. Therefore, it would have been obvious to one having ordinary skill in the art to have used the teaching of coating a fabric with different compositions on each surface of the fabric as taught by of Koerber et al. or Agarwal et al. or George et al. on the fabric of George et al., motivated by the desire to create a fabric having differing properties and different functions.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ula C Ruddock whose telephone number is 571-272-1481. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H. Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
